Scouring Products for Utensil Cleaning

Scope

This Standard prescribes the requirements, the methods of sampling and tests for dishes and utensil cleaning products

The product is classified into four types based on the product form as Type I(Bar), Type 2(Liquid), Type 3(Paste) and Type 4 (Powder).

Requirements

The standard permits a mixture of active (cleansing) ingredient and suitable additives and builders. The standard also suggests a list of builders and additives that may be used in the product.

The standard specifies the following requirements:

1. Active matter
2. Active (Reserve) alkalinity
3. Matter insoluble in alcohol
4. Moisture and volatile matter content
5. Lather
6. Cleaning efficacy
7. Tough soil cleaning
8. Surface damage
